# AM-155 / AMC-155

# High Dynamic Range Amplifier, 12.5 dB Gain, 300 - 1000 MHz

### **Features**

- 2.5 dB Typical Midband Noise Figure
- +21 dBm Typical Midband Output Power
- +37 dBm Typical Midband Third Order Intercept

### Description

M/A-COM's AM-155 is a coupler feedback amplifier with high intercept and compression points. The use of coupler feedback minimizes noise figure and current in a high intercept amplifier. This amplifier is packaged in a TO-8 package. Due to the internal power dissipation the thermal rise minimized. The ground plane on the PC board should be configured to remove heat from under the package. AM-155 is ideally suited for use where a high intercept, high reliability amplifier is required.

### **Ordering Information**

Part Number	Package			
AM-155 PIN <sup>3</sup>	TO-8-1			
AMC-155 SMA	Connectorized			

3. Mounting kit part number AU00071 required for PCB applications.

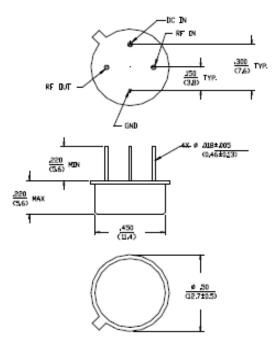

# Absolute Maximum Ratings<sup>1</sup>

Parameter	Absolute Maximum			
Max. Input Power	+10 dBm			
Vbias	+15.75 V			
Operating Temperature	-55°C to +85°C			
Storage Temperature	-65°C to +125°C			

1. Operation of this device above any one of these parameters may cause permanent damage.
