

# Low Noise Amplifier 1.4-4.0 GHz

Rev. V2

#### **Features**

- Low Noise Figure
- **Excellent Input Return Loss**
- Single Voltage Bias 3 V
- Integrated Active Bias Circuit
- Current Adjustable 20-80 mA with an **External Resistor**
- High Linearity, OIP3 > 34 dBm
- Small Package: 2 mm PDFN-8LD
- RoHS\* Compliant and 260°C Reflow Compatible

#### Description

The MAAL-010706 is a high dynamic range single stage MMIC LNA with excellent linearity and low noise figure designed for operation from 1.4 to 4.0 GHz. The LNA is packaged in an RoHS compliant leadless 2 mm 8-lead PDFN package.

This MMIC has an integrated active bias circuit allowing direct connection to +3 V voltage supply and minimizing variation over temperature and process. The bias current and gain can be set with external resistors to allow the user to customize the current and gain value to fit the application.

The MAAL-010706 offers less than 0.7 dB noise figure, more than 34 dBm OIP3 and 20 dB input return loss. The excellent input match, low noise figure and high OIP3 along with the flexibility of setting current and gain make this LNA ideal for 3G and 4G cellular infrastructure applications.

For optimum performance below 1.4 GHz the MAAL -010705 is recommended. The MAAL-010706 and MAAL-010705 share the package type and footprint.

## **Functional Block Diagram**

## Pin Configuration

Pin No.	Pin Name	Description		
1	N/C	No Connection		
2	RF <sub>IN</sub>	RF Input		
3	RF GND	RF Ground		
4	V <sub>BIAS</sub>	Bias Voltage		
5	FB	Feedback		
6	N/C	No Connection		
7	RF <sub>OUT</sub>	RF Output		
8	N/C	No Connection		

# Ordering Information 1,2

Part Number	Package		
MAAL-010706-TR3000	tape and reel		
MAAL-010706-001SMB	evaluation board		

- 1. Reference Application Note M513 for reel size information.
- 2. All sample boards include 5 loose parts.

<sup>3.</sup> Vd and Vbias are connected together to +4 V, R3 = 300 ohms and R4 = 240 ohms, reference recommended schematic on page 8.

# **Absolute Maximum Ratings**<sup>4,5</sup>

Parameter	Absolute Max.		
Supply Voltage	+5.5 V		
Current	100 mA		
Power Dissipation	600 mW		
RF Input Power	20 dBm		
Storage Temperature	-55 to +150 °C		
Operating Temperature	-40 to +85 °C		
Junction Temperature <sup>6</sup>	+150 °C		

<sup>4.</sup> Exceeding any one or combination of these limits may cause permanent damage to this device.

## **Handling Procedures**

Please observe the following precautions to avoid damage:

## **Static Sensitivity**

Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these class 1A devices.

• India Tel: +91.80.43537383

• China Tel: +86.21.2407.1588

<sup>5.</sup> M/A-COM Technology Solutions does not recommend sustained operation near these survivability limits.

<sup>6.</sup> Typical thermal resistance (Θjc) = 45 °C/W.

#### **Evaluation Board**

#### **Recommended Schematic**

Vbias and Vd are separate connections on the evaluation board to give the option of varying Id without changing R4. They can be connected together to a single voltage supply during the measurement and the final in layout implementation of the PCB. If two different voltage supplies are used then apply Vd first and then VBias to turn on the LNA. To turn off the LNA disconnect Vbias first and then Vd. R3 is varied to obtain different levels of gain. R4 is varied to change the drain current Id.
