

Package: SOT-115J

Product Description

The OS10040320PW is a hybrid high dynamic range optical receiver amplifier module. Two of the module pins are for connection to 24V (DC), one for amplifier supply voltage, the other for the PIN diode bias. The module contains a single mode optical input suitable for wavelengths from 1290nm to 1600nm, a terminal to monitor the PIN diode current, and an electrical output with an impedance of 75Ω. Fiberglass optical coupling; maximum tensile strength=5N; minimum bending radius=35mm.
