

High voltage fast-switching NPN power transistor

Features

- High voltage capability
- High DC current gain
- Minimum lot-to-lot spread for reliable operation
- Wide safe operating areas (forward and reverse biased)

Applications

- Switching mode power supplies

Description

The STW3040 is manufactured using diffused collector in planar technology adopting base island layout. The device is designed for use in SMPS and desktop power supply.

4 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
