

LOW-VOLTAGE RAIL-TO-RAIL OUTPUT OPERATIONAL AMPLIFIERS

 Check for Samples: [LMV821-Q1](#), [LMV822-Q1](#), [LMV824-Q1](#)

FEATURES

- Qualified for Automotive Applications
- 2.5-V, 2.7-V, and 5-V Performance
- –40°C to 125°C Operation
- No Crossover Distortion
- Low Supply Current at $V_{CC+} = 5\text{ V}$
 - LMV821: 0.3 mA Typ
 - LMV822: 0.5 mA Typ
 - LMV824: 1 mA Typ
- Rail-to-Rail Output Swing
- Gain Bandwidth of 5.5 MHz Typ at 5 V
- Slew Rate of 1.9 V/ μs Typ at 5 V

The LMV82x devices are characterized for operation from –40°C to 125°C.

DESCRIPTION/ORDERING INFORMATION

The LMV821 single, LMV822 dual, and LMV824 quad devices are low-voltage (2.5 V to 5.5 V), low-power commodity operational amplifiers. Electrical characteristics are very similar to the LMV3xx operational amplifiers (low supply current, rail-to-rail outputs, input common-mode range that includes ground). However, the LMV82x devices offer a higher bandwidth (5.5 MHz typical) and faster slew rate (1.9 V/ μs typical).

The LMV82x devices are cost-effective solutions for applications requiring low-voltage/low-power operation and space-saving considerations. The LMV821 saves space on printed circuit boards and enables the design of small portable electronic devices (cordless and cellular phones, laptops, PDAs, PCMCIA). It also allows the designer to place the device closer to the signal source to reduce noise pickup and increase signal integrity.

ORDERING INFORMATION⁽¹⁾

T_A	PACKAGE ⁽²⁾		ORDERABLE PART NUMBER	TOP-SIDE MARKING ⁽³⁾	
–40°C to 125°C	Single	SOT-23 – DBV	Reel of 3000	LMV821QDBVRQ1	RB1_
	Dual	MSOP/VSSOP – DGK	Reel of 2500	LMV822QDGKRQ1	R8B
	Quad	SOIC – D	Reel of 2500	LMV824QDRQ1	LMV824Q
		TSSOP – PW	Reel of 2000	LMV824QPWRQ1	MV824Q

(1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI web site at www.ti.com.

(2) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

(3) DBV: The actual top-side marking has one additional character that designates the wafer fab/assembly site.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

SYMBOL (EACH AMPLIFIER)

SIMPLIFIED SCHEMATIC

ABSOLUTE MAXIMUM RATINGS⁽¹⁾

over operating free-air temperature range (unless otherwise noted)

V_{CC}	Supply voltage ⁽²⁾		5.5 V
V_{ID}	Differential input voltage ⁽³⁾		$\pm V_{CC}$
V_I	Input voltage range (either input)		V_{CC-} to V_{CC+}
	Duration of output short circuit (one amplifier) to ground ⁽⁴⁾	At or below $T_A = 25^\circ\text{C}$, $V_{CC} \leq 5.5\text{ V}$	Unlimited
θ_{JA}	Package thermal impedance ⁽⁵⁾ (6)	D package	97°C/W
		DBV package	206°C/W
		DGK package	172°C/W
		PW package	113°C/W
T_J	Operating virtual-junction temperature		150°C
T_{stg}	Storage temperature range		-65°C to 150°C

- (1) Stresses beyond those listed under *absolute maximum ratings* may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *recommended operating conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values (except differential voltages and V_{CC} specified for the measurement of I_{OS}) are with respect to the network GND.
- (3) Differential voltages are at IN+ with respect to IN-.
- (4) Short circuits from outputs to V_{CC} can cause excessive heating and eventual destruction.
- (5) Maximum power dissipation is a function of $T_J(\text{max})$, θ_{JA} , and T_A . The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(\text{max}) - T_A)/\theta_{JA}$. Operating at the absolute maximum T_J of 150°C can affect reliability.
- (6) The package thermal impedance is calculated in accordance with JESD 51-7.

RECOMMENDED OPERATING CONDITIONS

	MIN	MAX	UNIT
V_{CC} Supply voltage (single-supply operation)	2.5	5	V
T_A Operating free-air temperature	-40	125	°C

2.5-V ELECTRICAL CHARACTERISTICS

$V_{CC+} = 2.5\text{ V}$, $V_{CC-} = 0\text{ V}$, $V_{IC} = 1\text{ V}$, $V_O = 1.25\text{ V}$, and $R_L > 1\text{ M}\Omega$ (unless otherwise noted)

PARAMETER	TEST CONDITIONS	T_A	MIN	TYP	MAX	UNIT	
V_{IO} Input offset voltage		25°C		1	6	mV	
		-40°C to 125°C			6		
V_O Output swing	$V_{CC+} = 2.5\text{ V}$, $R_L = 600\ \Omega$ to 1.25 V	High level	25°C	2.28	2.37	V	
			-40°C to 125°C	2.18			
		Low level	25°C		0.13		0.22
			-40°C to 125°C				0.32
	$V_{CC+} = 2.5\text{ V}$, $R_L = 2\text{ k}\Omega$ to 1.25 V	High level	25°C	2.38	2.46		
			-40°C to 125°C	2.28			
		Low level	25°C		0.08		0.14
			-40°C to 125°C				0.22

2.7-V ELECTRICAL CHARACTERISTICS

$V_{CC+} = 2.7\text{ V}$, $V_{CC-} = 0\text{ V}$, $V_{IC} = 1\text{ V}$, $V_O = 1.35\text{ V}$, and $R_L > 1\text{ M}\Omega$ (unless otherwise noted)

PARAMETER		TEST CONDITIONS		T_A	MIN	TYP	MAX	UNIT
V_{IO}	Input offset voltage			25°C		1	6	mV
				-40°C to 125°C			6	
α_{VIO}	Average temperature coefficient of input offset voltage			25°C		1		$\mu\text{V}/^\circ\text{C}$
I_{IB}	Input bias current			25°C		30	90	nA
				-40°C to 125°C			140	
I_{IO}	Input offset current			25°C		0.5	30	nA
				-40°C to 125°C			50	
CMRR	Common-mode rejection ratio	$V_{IC} = 0\text{ to }1.7\text{ V}$		25°C	70	85		dB
				-40°C to 125°C	68			
$+k_{SVR}$	Positive supply-voltage rejection ratio	$V_{CC+} = 1.7\text{ V to }4\text{ V}$, $V_{CC-} = -1\text{ V}$, $V_O = 0$, $V_{IC} = 0$		25°C	75	85		dB
				-40°C to 125°C	70			
$-k_{SVR}$	Negative supply-voltage rejection ratio	$V_{CC+} = 1.7\text{ V}$, $V_{CC-} = -1\text{ V to }-3.3\text{ V}$, $V_O = 0$, $V_{IC} = 0$		25°C	73	85		dB
				-40°C to 125°C	70			
V_{ICR}	Common-mode input voltage range	CMRR $\geq 50\text{ dB}$		25°C	-0.2 to 1.9	-0.3 to 2		V
A_V	Large-signal voltage amplification	$R_L = 600\ \Omega\text{ to }1.35\text{ V}$, $V_O = 1.35\text{ V to }2.2\text{ V}$	Sourcing	25°C	90	100		dB
				-40°C to 125°C	85			
		$R_L = 600\ \Omega\text{ to }1.35\text{ V}$, $V_O = 1.35\text{ V to }0.5\text{ V}$	Sinking	25°C	85	90		
				-40°C to 125°C	80			
$R_L = 2\text{ k}\Omega\text{ to }1.35\text{ V}$, $V_O = 1.35\text{ V to }2.2\text{ V}$	Sourcing	25°C	95	100				
		-40°C to 125°C	90					
$R_L = 2\text{ k}\Omega\text{ to }1.35\text{ V}$, $V_O = 1.35\text{ V to }0.5\text{ V}$	Sinking	25°C	90	95				
		-40°C to 125°C	85					
V_O	Output swing	$V_{CC+} = 2.7\text{ V}$, $R_L = 600\ \Omega\text{ to }1.35\text{ V}$	High level	25°C	2.5	2.58		V
					-40°C to 125°C	2.4		
			Low level	25°C		0.13	0.2	
					-40°C to 125°C		0.3	
		$V_{CC+} = 2.7\text{ V}$, $R_L = 2\text{ k}\Omega\text{ to }1.35\text{ V}$	High level	25°C	2.6	2.66		
					-40°C to 125°C	2.5		
Low level	25°C		0.08	0.12				
		-40°C to 125°C		0.2				
I_O	Output current	$V_O = 0\text{ V}$	Sourcing	25°C	12	16		mA
		$V_O = 2.7\text{ V}$	Sinking	25°C	12	26		
I_{CC}	Supply current	LMV821		25°C		0.22	0.3	mA
					-40°C to 125°C			
		LMV822 (both amplifiers)		25°C		0.45	0.6	
					-40°C to 125°C			
		LMV824 (all four amplifiers)		25°C		0.72	1	
					-40°C to 125°C			

2.7-V ELECTRICAL CHARACTERISTICS (continued)

$V_{CC+} = 2.7\text{ V}$, $V_{CC-} = 0\text{ V}$, $V_{IC} = 1\text{ V}$, $V_O = 1.35\text{ V}$, and $R_L > 1\text{ M}\Omega$ (unless otherwise noted)

PARAMETER		TEST CONDITIONS	T_A	MIN	TYP	MAX	UNIT
SR	Slew rate ⁽¹⁾		25°C		1.7		V/ μ s
GBW	Gain bandwidth product	⁽²⁾	25°C		5		MHz
Φ_m	Phase margin	⁽²⁾	25°C		60		deg
	Gain margin	⁽²⁾	25°C		8.6		dB
	Amplifier-to-amplifier isolation	$V_{CC+} = 5\text{ V}$, $R_L = 100\text{ k}\Omega$ to 2.5 V ⁽³⁾	25°C		135		dB
V_n	Equivalent input noise voltage	$f = 1\text{ kHz}$, $V_{IC} = 1\text{ V}$	25°C		45		nV/ $\sqrt{\text{Hz}}$
I_n	Equivalent input noise current	$f = 1\text{ kHz}$	25°C		0.18		pA/ $\sqrt{\text{Hz}}$
THD	Total harmonic distortion	$f = 1\text{ kHz}$, $A_V = -2$, $R_L = 10\text{ k}\Omega$, $V_O = 4.1\text{ V}_{p-p}$	25°C		0.01		%

- (1) Connected as voltage follower with 1-V step input. Value specified is the slower of the positive and negative slew rates.
 (2) 40-dB closed-loop dc gain, $C_L = 22\text{ pF}$
 (3) Each amplifier excited in turn with 1 kHz to produce $V_O = 3\text{ V}_{p-p}$

5-V ELECTRICAL CHARACTERISTICS

$V_{CC+} = 5\text{ V}$, $V_{CC-} = 0\text{ V}$, $V_{IC} = 2\text{ V}$, $V_O = 2.5\text{ V}$, and $R_L > 1\text{ M}\Omega$ (unless otherwise noted)

PARAMETER		TEST CONDITIONS		T_A	MIN	TYP	MAX	UNIT

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBsolete: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

DBV (R-PDSO-G5)

PLASTIC SMALL-OUTLINE PACKAGE

- NOTES:
- A. All linear dimensions are in millimeters.
 - B. This drawing is subject to change without notice.
 - C. Body dimensions do not include mold flash or protrusion. Mold flash and protrusion shall not exceed 0.15 per side.
 - D. Falls within JEDEC MO-178 Variation AA.

DBV (R-PDSO-G5)

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in millimeters.
 - B. This drawing is subject to change without notice.
 - C. Customers should place a note on the circuit board fabrication drawing not to alter the center solder mask defined pad.
 - D. Publication IPC-7351 is recommended for alternate designs.
 - E. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Example stencil design based on a 50% volumetric metal load solder paste. Refer to IPC-7525 for other stencil recommendations.

 - This drawing is subject to change without notice.
 - Publication IPC-7351 is recommended for alternate designs.
 - Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC-7525 for other stencil recommendations.
 - Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
