### Description

The STM3210C-EVAL evaluation board is a complete development platform for STMicroelectronics' ARM Cortex-M3 core-based STM32F107VCT microcontroller. The range of hardware features on the board help you to evaluate all peripherals (USB-OTG FS, ethernet, motor control, CAN, microSD Card™, smartcard, USART, audio DAC, MEMS, EEPROM and more) and develop your own applications.

Extension headers make it easy to connect a daughterboard or wrapping board for your specific application.
