WP240 (v1.1) December 11, 2006

# AccelDSP Synthesis Tool Supported MATLAB Constructs 

 and FunctionsThis document provides a concise overview of the subset of the MATLAB language, including operators, as well as built-in and toolbox functions supported by AccelDSP ${ }^{\text {TM }}$ Synthesis Tool for algorithmic synthesis targeting Xilinx FPGAs. Consult the AccelDSP MATLAB for Synthesis Style Guide for additional information.

[^0]Programming with MATLAB
Table 1: Data Types and Quantize Functions

| Name | Description |
| :--- | :--- |
| Scalar arrays | An array with dimensions $1 \times 1$ |
| Vector arrays | An array with dimensions $1 \times \mathrm{n}$ |
| Matrix arrays | An array with dimensions $\mathrm{m} \times \mathrm{n}$ |
| structure | Create a structure inside the design function |
| char | Limited to String Constants |
| gf | Create a Galois field array |
| quantize | Defines the fixed-point parameters of a variable |
| quantizer | Applies the quantize object to a variable |

Table 2: Flow Control

| Name | Description |
| :--- | :--- |
| if-elseif-else | Evaluates an expression and executes a set of commands |
| for / end | Repeats a set of commands a specified number of times |
| switch-case | Executes a set of commands based on an expression |
| while / end | Repeats a set of commands until a logical condition is false |
| end | Defines the end of an IF, FOR and WHILE statement |
| otherwise | Supported as part of the switch statement |

Table 3: Scripts and Functions

| Name | Description |
| :--- | :--- |
| function | Defines a function containing executable MATLAB |
| persistent | Define persistent variable |
| $\%$ | Comment |

## Table 4: Basic Information

| Name | Description |
| :--- | :--- |
| eps | Floating-point relative accuracy |
| isempty | True for an empty matrix. Supported for the initialization of <br> persistent variables. |
| length | Length of a vector |
| ndims | Number of array dimensions |
| size | Size of a matrix |

Table 5: Array Operations and Manipulations

| Name |  |
| :--- | :--- |
| $:$ | Index into array |
| dot | Scalar product of two vectors |
| end | Last index |
| max | Max elements of array |
| min | Min elements of array |
| reshape | Use to modify the shape of a matrix |
| inv | Vector and matrix norm |
| norm | Return the mean of a matrix or array elements |
| mean | Test to determine if all elements are non-zero |
| all | Test for non-zeros |
| any | Sum of an array of elements |
| sum | Cumulative sum along different dims |
| cumsum | Product of the elements of an array |
| prod | Cumulative product of the elements of an array |
| cumprod | Flip matrices left-right |
| fliplr | Flip matrices up-down |
| flipud | Rotate matrix 90 degrees |
| rot90 | Differences and approximate derivatives |
| diff | Concatenation. Limited to two variables |
| cat |  |

Table 6: Elementary Matrices and Arrays

| Name | Description |
| :--- | :--- |
| $:$ | Regularly spaced vector |
| eye | Identity matrix |
| ones | Create array of all ones |
| zeros | Create array of all zeros |
| bi2de | Convert input matrices to decimal numbers. Input is restricted to <br> base 2 numbers. |
| de2bi | Convert decimal numbers to binary vectors |

## Table 7: Opening, Loading, and Saving Files

| Name | Description |
| :--- | :--- |
| load | Load workspace from disk |

## Mathematics

Table 8: Mathematical Operators

| Name | Description |
| :---: | :---: |
| +, plus, accel_complex_plus | Addition |
| -, minus, accel_complex_minus | Subtraction |
| .${ }^{*}$, times, accel_complex_times | Array multiplication |
| *, mtimes, accel_complex_mtimes | Matrix multiplication |
| $\wedge$, power | Array power |
| $\wedge$, mpower | Matrix power where the exponent must be a scalar integer |
| pow2 | Base 2 power and scale floating-point number |
| nextpow2 | Next power of two |
| ./ | Right array divide |
| /, rdivide | Right matrix divide |
| . 1 | Left array divide |
| $\backslash$, ldivide | Left matrix divide |
|  | Transpose |
| .' | Noconjugated transpose |

## Table 9: Relational Operators

| Name | $\quad$ Description |
| :--- | :--- |
| $<$ | Less than |
| $<=$ | Less than or equal |
| $>$ | Greater than |
| $>=$ | Greater than or equal |
| $==$, eq | Test for equality |
| $\sim=$, ne | Not equal |

Table 10: Logical Operators

| Name |  |
| :--- | :--- |
| $\& \&$ | Logical AND |
| $\\|$ | Logical OR |
| $\&$ | Logical AND for arrays |
| $\\|$ | Logical OR for arrays |
| $\sim$ | Logical NOT |
| false | False array |
| true | True array |

Table 11: MATLAB Bit-Wise Operators

| Name | Description |
| :--- | :--- |
| bitand | Bitwise and |
| bitcmp | Bitwise compare. Overloaded with accel_bitcmp. |
| bitget | Bitwise get |
| bitor | Bitwise or |
| bitset | Bitwise set |
| bitshift | Bitwise shift. Overloaded with accel_bitshl and accel_bitshr. |
| bitxor | Bitwise xor |

## Table 12: AcceIDSP Bit-Wise Operators

| Base Function | Description |
| :--- | :--- |
| accel_bitand | Returns the unsigned bit-wise AND of two integers |
| accel_bitcmp | Returns the unsigned bit-wise complement of an integers |
| accel_bitmerge | Concatenates two components, MSB (most-significant bits) and LSB <br> (least-significant bits) into one output word |
| accel_bitnand | Returns the unsigned bit-wise NAND of two integers |
| accel_bitnor | Returns the unsigned bit-wise NOR of two integers |
| accel_bitor | Returns the unsigned bit-wise OR of two integers |
| accel_bitpack | Returns a single value-representation of the bit-vector argument x <br> quantized to quantizer q |
| accel_bitrev2 | Returns the unsigned digit reversal of the argument IN |
| accel_bitrev | Returns the unsigned bit-wise reversal of the argument IN |
| accel_bitshl | Returns the unsigned bit-wise shift-left of the argument IN shifted <br> left by N bits |
| accel_bitshr | Returns the unsigned bit-wise shift-right of the argument IN shifted <br> right by N bits |
| accel_bitsplit | Splits the input value into MSB (most-significant bits) and LSB <br> (least-significant bits) components according to the bitwidths <br> specified in the specified quantizers |
| accel_bitunpack | Returns a row-vector bit-representation of the scalar argument x <br> quantized to the quantizer qout |
| accel_bitunpackselect | Returns the i'th element from the output of accel_bitunpack(x,q) |
| accel_bitxor | Returns the unsigned bit-wise XOR of two integers |

Table 13: Linear Algebra

| Name | Description |
| :--- | :--- |
| chol | Matrix factorization using Cholesky method. Supported with <br> AccelWare. |
| inv | Matrix Inverse (QR, Cholesky, Upper Triangular). Supported with <br> AccelWare. |
| qr | Matrix factorization using QR Decomposition method. Supported <br> with AccelWare. |
| qrdrls | QRD-RLS Spatial Filter. Supported with AccelWare. |
| svd | Singular value decomposition. Supported with AccelWare. |
| vector rotation | Preforms a givens rotation on a vector pair. Supported with <br> AccelWare. |
| Triangular System of <br> Equations Solver | Computes the solution to an upper or lower triangular system of <br> equations using backward or forward substitution, respectively. <br> Supported with AccelWare. |

Table 14: Statistics

| Name | Description |
| :--- | :--- |
| mean | Mean value. Supported with AccelWare. |
| norm | Norm. Supported with AccelWare. |
| std | Standard Deviation. Supported with AccelWare. |
| var | Variance. Supported with AccelWare. |

Table 15: Trigonometric Functions

| Name | Description |
| :--- | :--- |
| sin, accel_sin | Sine |
| cos, accel_cos | Cosine |
| tan, accel_tan | Tangent |
| asin, accel_asin | Inverse sine |
| acos, accel_acos | Inverse cosine |
| atan, accel_atan | Inverse tangent |
| atan2, accel_atan2 | Four-quadrant inverse tan |

## Table 16: Polynomials

| Name | Description |
| :--- | :--- |
| polyval | Returns the value of a polynomial. Supported with AccelWare. |

Table 17: Exponential Functions

| Name | Description |
| :--- | :--- |
| exp | Exponential |
| $\log$ | Natural logarithm |
| $\log 10$ | Base 2 logarithm |
| $\log 2$ | Base 10 logarithm |
| pow2 | Base 2 power |
| power | Array power. Same as X.^Y |
| mpower | Matrix power where the exponent must be a scalar integer. Same as <br> $X^{\wedge}$ Y where Y is a scalar integer. |
| reallog | Base e logarithm |
| sqrt | Square root |
| realsqrt | Square root for non-negative real arrays |
| Inverse Square Root | Returns 1/sqrt(x). Supported through AccelWare. |
| realpow | Array power for real output |

Table 18: Complex Numbers

| Name | Description |
| :--- | :--- |
| abs, accel_abs | Absolute value |
| angle, accel_angle | Returns phase angle and magnitude |
| cart2pol | Cartesian corrdinates to polar or cylindrical |
| complex norm | Complex Normalization. Supported with AccelWare. |

## Table 19: Rounding and Remainder

| Name |  |
| :--- | :--- |
| ceil | Round towards positive infinity |
| convergent | Round to nearest integer |
| fix | Round towards zero |
| floor | Round towards negative infinity |
| mod | Modulus after division |
| rem | Remainder after division |
| round | Round towards integer |
| sign | Signum |

## Table 20: Discrete Math

| Name | Description |
| :--- | :--- |
| factorial | Is the product of all the integers from 1 to n |

Table 21: Math Constants

| Name | Description |
| :--- | :--- |
| pi | Ratio of a circle's circumference/diameter |

## Signal Processing Library

Table 22: General-Purpose FIR Filters

| Name | Description |
| :--- | :--- |
| dfilt | Discrete-Time Filters. Supported with AccelWare. |
| filter | Fixed coefficient FIR filter. Supported with AccelWare. |
| filter - loadcoef | Loadable coefficients FIR filter. Supported with AccelWare. |
| filter - multchan | Multi-channel FIR filter. Supported with AccelWare. |

## Table 23: Multi-Rate Filters

| Name | Description |
| :--- | :--- |
| cicdecim | Cascaded Integrator-Comb decimation filter. Supported with <br> AccelWare. |
| cicinterp | Cascaded Integrator-Comb interpolation filter. Supported with <br> AccelWare. |
| mfilt.firdecim | Construct direct-form FIR polyphase decimator filter. Supported with <br> AccelWare. |
| mfilt.firtdecim | Construct direct-form transposed FIR filter. Supported with <br> AccelWare. |
| firhalfband | Half-band FIR filter. Supported with AccelWare. |

## Table 24: Other Filters

| Name | Description |
| :--- | :--- |
| a_dsinccompensation | A/D Sinc Compensation filter. Supported with AccelWare. |
| cicdecimate | Cascaded Integrator-Comb (CIC) decimation filter. Supported with <br> AccelWare. |
| cicinterpolate | Cascaded Integrator-Comb (CIC) interpolation filter. Supported <br> with AccelWare. |
| rcosfir | Root-Raised Cosine (RRC) filter. Supported with AccelWare. |

## Table 25: Transformations

| Name | Description |
| :--- | :--- |
| fft - radix 2 | Fast-Fourier transform. Supported with AccelWare. |
| ifft - radix 2 | Inverse Fast-Fourier transform. Supported with AccelWare. |
| fft - radix 4 | Fast-Fourier transform. Supported with AccelWare. |
| ifft - radix 4 | Inverse Fast-Fourier transform. Supported with AccelWare. |

## Communications Library

Table 26: Direct Digital Synthesizers

| Name | Description |
| :--- | :--- |
| dds | Direct Digital Synthesizer. Supported with AccelWare. |

## Table 27: Encoders/Decoders

| Name | Description |
| :--- | :--- |
| convenc | Convolutional encoder. Supported with AccelWare. |
| convintlv | Convolutional interleaver. Supported with AccelWare. |
| convdeintlv | Convolutional deinterleaver. Supported with AccelWare. |
| rsenc | Reed Solomon/BCH encoder. Supported with AccelWare. |
| rsdec | Reed Solomon/BCH decoder. Supported with AccelWare. |
| vitdec | Viterbi decoder. Supported with AccelWare. |
| bchenc | BCH encoder. Supported with AccelWare. |
| bchdec | BCH decoder. Supported with AccelWare. |

## Table 28: Scramblers/Descramblers

| Name | Description |
| :--- | :--- |
| scrambler | Custom 16-bit wide scrambler. Supported with AccelWare. |
| descrambler | Custom 16-bit wide scrambler. Supported with AccelWare. |

## Revision History

The following table shows the revision history for this document.

| Date | Version | Revision |  |
| :---: | :---: | :--- | :--- |
| $04 / 19 / 06$ | 1.0 | Initial Xilinx release. |  |
| $12 / 11 / 06$ | 1.1 | Updated all the tables. |  |
